WHO I AM

GET TO KNOW THE ARTIST

My curious soul for exploration and wanderlust is a big part of my inspiration. With my artwork I find storytelling, technique, and vivacious color that's influenced by memories and travel. I'm always finding new discovery, and purpose. My experiences pour openly and deeply into my paintings. I studied painting and serigraphy in college, and got my Bachelors Degree in Fine Art. I traveled to Italy my last semester to study the best renaissance painters and sculptures of the world. After I graduated in 2015, I pretty much hit the ground running, and haven't stopped since. I've spent the last 3 years traveling and living all over the world, working in various artist communities and residencies, in Los Angeles, Guatemala and Spain. My painting style is influenced by these explorations and makes it so richly contrasted. I paint with intention, yet born in the moment. My brush stokes are vivid in movement and show my free spirited approach. My purpose in my art is to create work that makes people feel alive, and connected to something bigger than themselves. I strive to create the unique touches in my art that people love, and can cherish forever.

Words to Inspire

**I WOULD RATHER
DIE OF PASSION
THAN OF BOREDOM.**

VINCENT VAN GOGH

COMMISSION OVERVIEW

A step by step run through of how the magic happens.

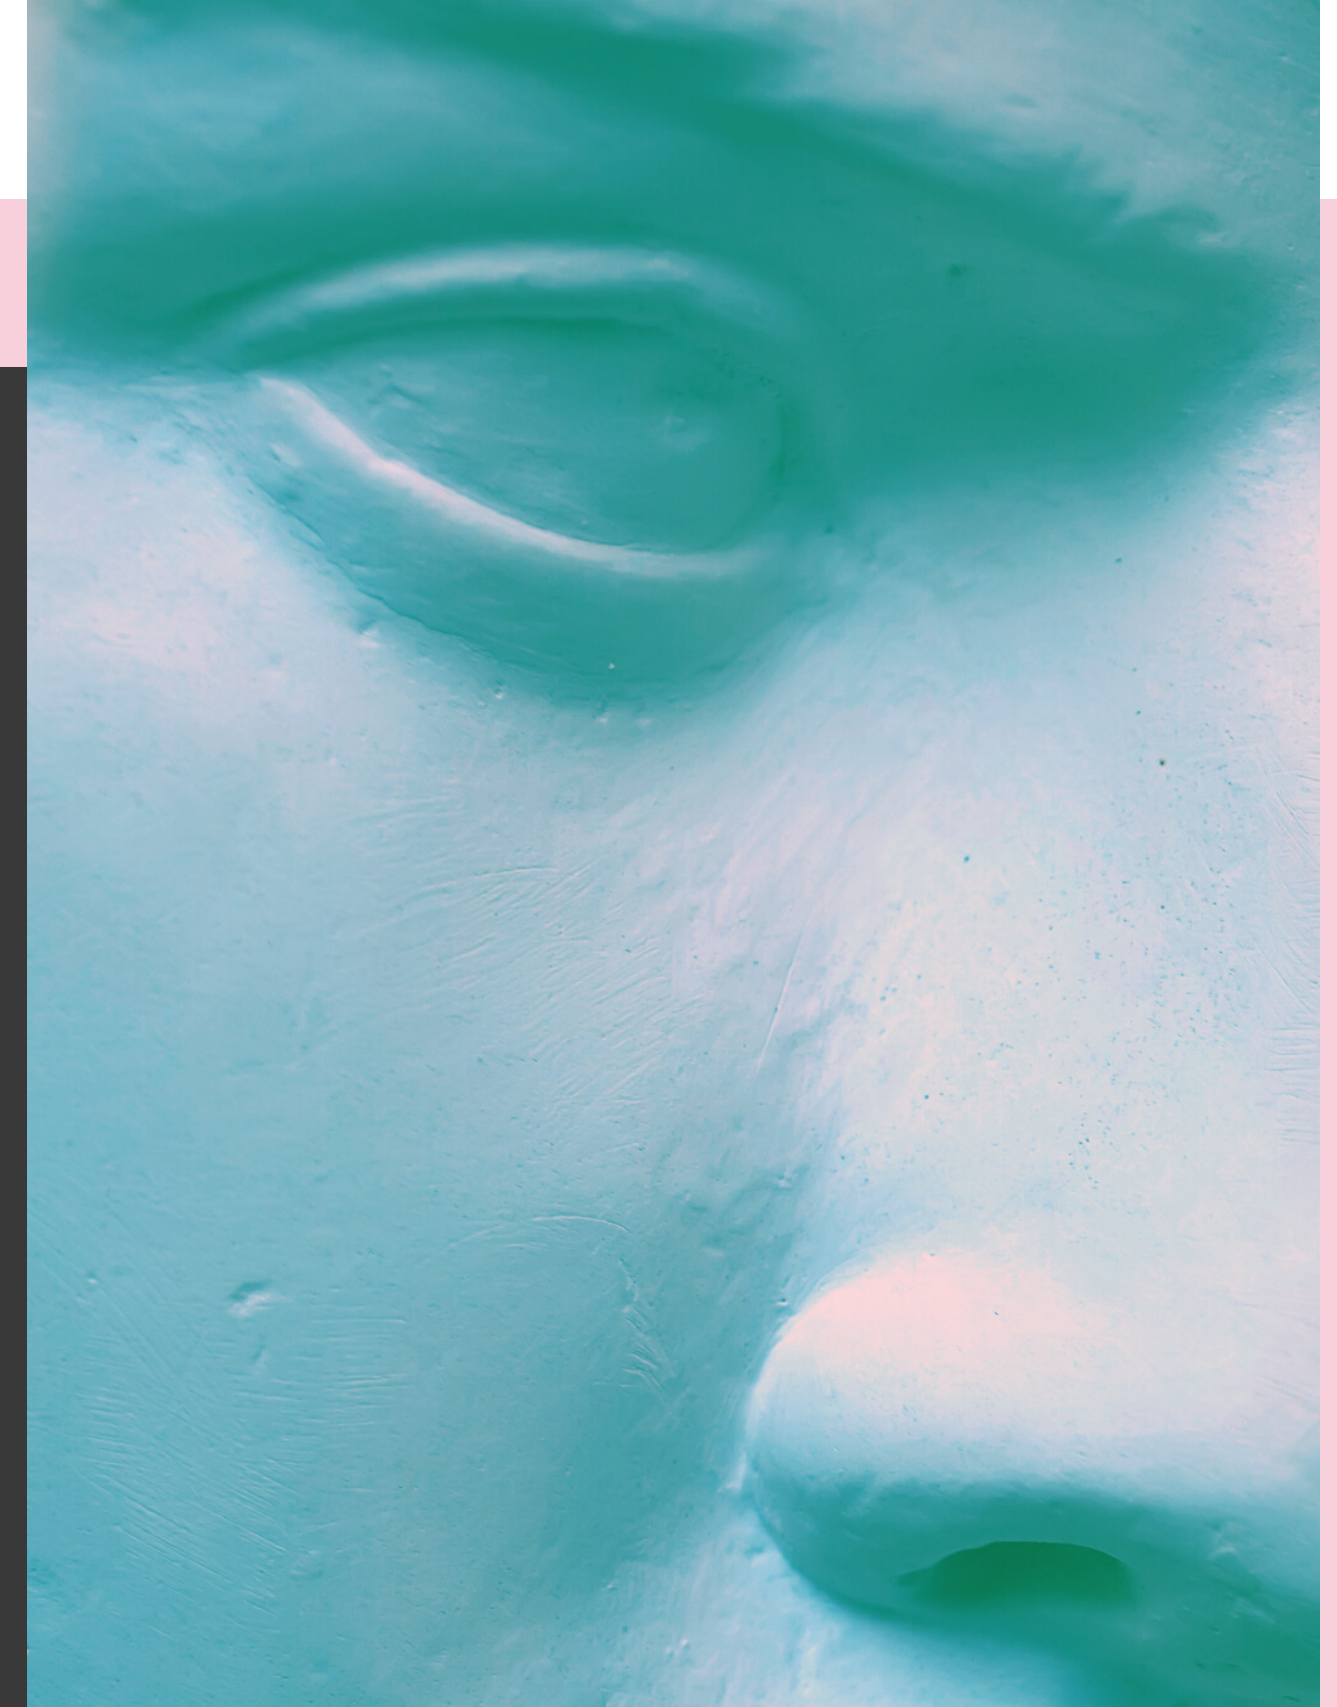

1. First things first, time to get this party started!

I ask you to send me pictures of your space for the painting. That way I can help choose the right dimensions for the canvas. We want that "IT'S THE PERFECT FIT" kind of feel.

If the painting is for a new space that's not fully built yet, or for a gift, you can send me dimensions for the size you are thinking. If you can measure the dimensions you want, even better.

I can paint any size, as I build all my canvases by scratch. I also have standard sizes universally used in the fine art society. You can select one of these sizes that will work seamlessly, These sizes are also what influence the way I price my work.

If you are still unsure on the size you want, you can simply tell me "I want a big rectangle canvas thats an abstract!" Or "I want a medium portrait of my cat!" We can start from there, when creating a Dona Morgan custom original, Anything. Is. Possible.

COMMISSION OVERVIEW

A step by step run through of how the magic happens.

2. Phone call to get all ideas out! Your chance to word vomit everything you want, imagine and are inspired about! I'll ask you some questions also, that will be important with creating your piece! Once I have received all your helpful info on what you want for the work of art, I will start creating color pallet & content ideas. Not just one idea, but I'll create a total of three mock up composites for your imagination to run wild with.

It will take a week to get these ideas finished and delivered to you. I usually ask for a deposit up front before we start the process, that is half of the final cost of the painting. I'm flexible with the payment terms and timing for the rest, just as long as we have an agreement that we reach and have written down before we start!

OVERVIEW CONTINUED

Composites, the Lucky One.

3. Once you have received the three mock up composites and ideas, you now get to select the lucky one! These composites are sketches, color pallets and written ideas for their deeper meaning. The brainstorming documents or blueprints to your masterpiece!

I designed my commission process to be exciting for you also. I get this weird but exciting tingle in my body when inspiration strikes, and this provides you with a similar build up. You're involved with the creative process, and able to start using your own imagination for the work of art. It's real passion beginning, and the selection process allows you to start visualizing our artistic movement. Art is powerful, and this will be an impactful experience that we create.

OVERVIEW CONTINUED

Composites, the Lucky One.

4. We will schedule another phone call to discuss the composites, so we're clear and on the same page together. (This call is usually 30min-1 hour long) During our chat, this is your opportunity to give a honest critique, tell me what you love and hate. We can modify anything, combine elements, tweak something in another, or talk about the mutual love we share for the lucky one.

We will discuss all details before I start the final painting. I'll begin when we've reached something that gives you that feeling like the kid riding his bicycle alone for the first time. But like training wheels breaking off in his dust trail, as he pedals faster and harder, a tooth missing grin from ear to ear, wind blowing in the hair, and all. You'll feel invigorated. I will too, and this is where you trust the ride, and now let me run with our ideas to create your masterpiece!

PROGRESS

4. I'll send you 2 updates and photos of the progress work on the painting. You can share input/concerns if you want to change anything along the way. Normally with clients I allow 2 free of charge changes during the final painting process. Then the rest that follow, I charge \$100 an hour for the additional time I spend working.

FINAL

5. The masterpiece is complete! I'll ship it to your home, and figure out the most affordable and comfortable shipping method that works best for you. You now own a true and authentic work of art. Painted specially just for you, and also inspired by you. .

STANDARD SIZING PRICE RANGES

PRICE RANGES ROUGHLY PER SIZE
